

Cross Vol Dedupe settings not inherited by Flexclone volume

https://kb.netapp.com/Advice_and_Troubleshooting/Data_Storage_Software/ONTAP_OS/Cross_Vol_D...

Updated: Sun, 11 Jul 2021 11:19:30 GMT

Applies to

- ONTAP 9
- NetApp AFF

Issue

FlexClone volume does not inherit [CVBD](#) settings when Automatic Dedupe Schedule (ADS) demotes the parent prior to the cloning:

Source volume

```
::> volume efficiency show -volume voll -instance  
Vserver Name: svm1  
Volume Name: voll
```

```
Volume Path: /vol/vol1
State: Enabled
Status: Idle
.....
Compression: true
Inline Compression: true
Constituent Volume: false
Inline Dedupe: true
Data Compaction: true
Cross Volume Inline Deduplication: true
Cross Volume Background Deduplication: true
Extended Compressed Data: true
```

Cloned Volume

```
::> volume efficiency show -volume vol1_clone -instance
Vserver Name: svm1
Volume Name: vol1_clone
Volume Path: /vol/vol1_clone
State: Enabled
Status: Idle
.....
Compression: true
Inline Compression: true
Constituent Volume: false
Inline Dedupe: true
Data Compaction: true
Cross Volume Inline Deduplication: true
Cross Volume Background Deduplication: false
Extended Compressed Data: true
```
