

Explicit user quota rules for NFS/CIFS accounts with only numbers not correctly handled

https://kb.netapp.com/Advice_and_Troubleshooting/Data_Storage_Software/ONTAP_OS/Explicit_user...

Updated: Tue, 10 Aug 2021 01:40:37 GMT

Applies to

- ONTAP 9
- Explicit user quotas
- Numeric usernames [LDAP, UNIX, Windows]

Issue

- DATA ONTAP - Explicit user quotas not being applied for numeric usernames

Example :

Explicit user quota rule has disk quota limit higher than the default user quota rule [username = "123456" ,
unix uid = 1000]

```
Cluster::> quota policy rule show -vserver svm1 -policy-name default -  
volume voll
```

```
Vserver: svm1    Policy: default          Volume: voll
```

Type	Target	Qtree	Soft User Mapping	Soft Disk Limit	Disk Limit	Files Limit	Files Limit
user	""	""	off	-	200GB	-	-
user	123456		off	-	400GB	-	-

Error from Client side :

```
Following quota exceeded:  
-bash-4.2$ touch new  
touch: cannot touch 'new': Disk quota exceeded
```
