## How to view log files over a specific time period in Clustered Data ONTAP

[https://kb.netapp.com/Advice\\_and\\_Troubleshooting/Data\\_Storage\\_Software/ONTAP\\_OS/How\\_to\\_view...](https://kb.netapp.com/Advice_and_Troubleshooting/Data_Storage_Software/ONTAP_OS/How_to_view...)

Updated: Thu, 29 Jul 2021 22:30:54 GMT

### Applies to

- Clustered Data ONTAP 8.3
- Clustered Data ONTAP 8.2
- Clustered Data ONTAP 8.1
- Clustered Data ONTAP 8

## Description

There are multiple log files in Clustered Data ONTAP.

When reading log files, the EMS log file should be referenced first, as it provides a centralized log location for all subsystems within the cluster, vservers, and nodes.

This article provides examples of viewing log files over a period of time in the cluster.
