

Snapmirror initialization is slow due to network bandwidth

https://kb.netapp.com/on-prem/ontap/DP/SnapMirror/SnapMirror-KBs/Snapmirror_initialization_is_slow...

Updated: Sun, 05 Apr 2026 05:49:33 GMT

Applies to

- ONTAP
- Snapmirror

Issue

- Snapmirror Initialization transfer is very slow 10+TB takes more than a month to complete the initial transfer.
- Since the initialization is not complete, the scheduled updates fail with the below error.

```
Cluster_dest::> snapmirror show -destination-path Vserver_dest:vol01_dest  
-fields state,status,total-progress,unhealthy-reason
```

source-path	destination-path	state	status
total-progress	unhealthy-reason		

Vserver_test:Vol1	Vserver_dest:vol01_des	Uninitialized	Transferring
23.09TB	Scheduled update failed to start. (Volume		
conusealarch01:ncsjptofpc01_group_kenvue_archive is not initialized.)
