## CONTAP-427577: Absorbing SetInfo with SMB2.FILE\_ENDOFFILE\_INFO at FlexCache to Prevent Eviction

<https://kb.netapp.com/on-prem/ontap/da/NAS/NAS-Issues/CONTAP-427577>

Updated: Sun, 05 Apr 2026 17:13:17 GMT

### Issue

When processing a SetInfo request with `{ }smb2.file_endoffile_info{ }`, the operation gets forwarded to the origin, causing an eviction. This scenario could be optimized by absorbing the request at the cache.
