

Not possible to disable MAV because the approval group was created with inadequate privileges

https://kb.netapp.com/on-prem/ontap/Ontap_OS/OS-KBs/Not_possible_to_disable_MAV_because_the...

Updated: Sun, 05 Apr 2026 12:18:29 GMT

Applies to

- ONTAP 9
- AFF/FAS systems

Issue

- Attempting to approve the MAV request by clicking the URL provided in the MAV email, System Manager does not fully load and remains on a blank screen.
- The System Manager for this cluster typically operates with multiple accounts; however, this issue arises specifically when trying to approve MAV requests.
- No account in the MAV approval group has CLI access.
