ONTAP 9

Issue

The `event log show` command fails to display `wafldir.size.max` errors, even though these messages are present in the AutoSupport (EMS) logs.

```
Mon Jul 17 08:02:59 [Node01: waflexempt02: wafldir.size.max:error]: Directory size for fileid 3727617 in volume vol01 reached the maxdirsize limit.
```

```
::*> event log show -node * -message-name *dir*  
There are no entries matching your query.
