

Can Snapmirror output be changed to show the cluster name instead of the SVM name

https://kb.netapp.com/on-prem/ontap/DP/SnapMirror/SnapMirror-KBs/Can_Snapmirror_output_be_cha...

Updated: Sat, 04 Apr 2026 17:34:42 GMT

Applies to

- Snapmirror
- Data ONTAP Cluster mode

Answer

No, this behavior is working as designed.
SnapMirror uses SVM names for source identification, and there is no option to modify this to use cluster names.
