

Does reapplying the RCF on a production Cluster Switch affect service?

https://kb.netapp.com/on-prem/Switches/Cisco-KBs/Will_reapplying_the_RCF_on_a_production_Clust...

Updated: Sun, 05 Apr 2026 12:34:18 GMT

Applies to

- Reference Configuration File (RCF)
- Cluster Switch

Answer

- Reapplying the RCF will reconfigure certain ports, temporarily disabling affected links and briefly disrupting connectivity.
- In redundant networks (multiple cluster ports/paths per node), communication continues over remaining links, though brief interruptions may still occur.
- Recommendation: Schedule RCF updates during a maintenance window, choose a low-impact time, and confirm redundancy and link status beforehand.
