

Brocade switch remains offline after power maintenance/outage

https://kb.netapp.com/on-prem/ontap/mc/MC-KBs/Brocade_switch_remains_offline_after_power_maint...

Updated: Sat, 04 Apr 2026 21:16:19 GMT

Applies to

- MetroCluster FC
- ONTAP 9
- Brocade Switches

Issue

After planned electrical maintenance or power outage, a Brocade MetroCluster switch did not come back online.

```
errdump -a  
/bin/cat/var/log/bc.history:  
01/10/2026-01:05:08,PowerCycle  
01/10/2026-00:52:05,PowerCycle  
01/10/2026-00:42:58,PowerCycle  
01/10/2026-00:45:07,PowerCycle.
```

FabricOS has detected frequent switch reboot condition.
The switch has been disabled as a preventive action.
If the switch reboots again, Rolling Reboot Detection will halt the switch from loading FabricOS.
Please use 'switchcfgpersistentenable' to enable the switch, once the problem is resolved
