

GCP CVO working environment deletion fails with permission denied error

https://kb.netapp.com/Cloud/ncds/nds/cvo/cvo_kbs/GCP_CVO_working_environment_deletion_fails_wi...

Updated: Sat, 04 Apr 2026 20:52:31 GMT

Applies to

- NetApp Console
- Cloud Volumes ONTAP (CVO)
- Google Cloud Platform (GCP)

Issue

- Attempting to delete a CVO instance from the NetApp Console fails with the error below:

```
Error: Permission 'config.deployments.get' denied on 'projects/<project-id>/locations/<location>/deployments/<deployment-name>'
{
```

```
"forceDelete": "false",
"localDelete": "false",
"workingEnvironmentId": "<working-environment-id>",
"workingEnvironmentName": "<working-environment-name>"
}
DescribeInfraDeployment failed
{
  "_failure": "Permission 'config.deployments.get' denied on 'projects/<project-id>/locations/<location>/deployments/<deployment-name>'",
  "location": "<location>",
  "name": "<deployment-name>"
}
```

- After updating IAM permissions, another error may occur:

```
DescribeInfraDeployments failed
{
  "_failure": "There was an internal server error.",
  "location": "<location>"
}
```
