

Cluster Port Degraded and Node panic after migration from switchless to switched cluster

https://kb.netapp.com/on-prem/Switches/Cisco-KBs/Cluster_Port_Degraded_and_Node_panic_after_m...

Updated: Sun, 05 Apr 2026 12:34:16 GMT

Applies to

- Cluster Network Switch (Cisco 9336C-FX2)
- ONTAP
- Sites migrating from switchless to switched cluster configuration

Issue

After migrating from a switchless to a switched cluster configuration, the following issues were observed:

- Cluster ports degraded and unable to serve data.
- Node2 panic, unable to join cluster or bring cluster applications online.
