

Copy and Sync S3 transfer reports InvalidUri error for some objects

https://kb.netapp.com/Cloud/ncds/nds/cs/cs_kbs/Copy_and_Sync_S3_transfer_reports_InvalidUri_erro...

Updated: Sat, 04 Apr 2026 17:26:56 GMT

Applies to

- NetApp Console Copy and Sync
- S3

Issue

- Copy and Sync reports `InvalidUri` error while reading some objects from the source
- In the `relationship.log` file, the following error can be found:

```
[2026-02-11T08:54:13.636] [WARN] [TRANSFERRER] [23] [2768713]
[6986471a66b65381d8e476e5] RETRYING copy from:
{"s3":{"bucket":"bucket1","tags":[],"provider":"s3","path":"","region":"us-
```

```
east-1", "encryption": {"protocol": "AES256"}}} to:
{"azure": {"path": "targetpath", "provider": "azure", "storageAccountName": "accoun
entry: {"path": "prefix/
objectname_with_\n_character", "size": 75309, "mtimeSec": 1769640068, "type": "FILE
InvalidUri
```

- Objects indicated by these errors are not successfully transferred to the target
