

Is it possible to check ONTAP patches or major version in AIQUM same as AIQDA?

https://kb.netapp.com/data-mgmt/AIQUM/AIQUM_Kbs/Is_it_possible_to_check_ONTAP_patches_or_m...

Updated: Sat, 04 Apr 2026 20:52:31 GMT

Applies to

- ActiveIQ Unified Manager (AIQUM) 9.x
- ActiveIQ Digital Advisor (AIQ/AIQDA)

Answer

- No, AIQUM cant check on available ONTAP versions/patches unlike AIQDA.
- AIQUM and AIQDA are two different tools with different purposes.
- AIQDA is a different tool build for updates/FW versions along with a high level details of clusters obtained from autosupport.
- AIQUM uses its own REST/ZAPI calls to gather data from ONTAP.

- Some AIQDA alerts are shown in AIQUM via AIQ events feature (mostly risks raised on AIQDA) via AIQCASecure rules, however managing and upgrading ONTAP patches is not included.
