

config.BadPoolAssign error occurs after DQP update on ONTAP SyncMirror configuration

https://kb.netapp.com/on-prem/ontap/OHW/OHW-KBs/config.BadPoolAssign_error_after_DQP_update...

Updated: Sun, 05 Apr 2026 20:58:08 GMT

Applies to

- NetApp FAS8300
- ONTAP 9.12.1P2
- NetApp SyncMirror
- Disk Qualification Package (DQP)

Issue

After updating the Disk Qualification Package (DQP):

- `config.BadPoolAssign:error` appears in the EMS log.

```
[?] Tue Feb 24 00:04:37 +0900 [node-01: config_check:  
config.BadPoolAssign:error]: Disk 1.10.3 is in Pool0 and other disks on  
this loop/domain are in Pool1. Disks/interfaces need to be in separate  
pools for SyncMirror.
```

```
[?] Tue Feb 24 00:04:37 +0900 [node-01: config_check:  
config.BadPoolAssign:error]: Disk 1.20.5 is in Pool0 and other disks on  
this loop/domain are in Pool1. Disks/interfaces need to be in separate  
pools for SyncMirror.
```

```
[?] Tue Feb 24 00:04:37 +0900 [node-01: config_check:  
config.BadPoolAssign:error]: Disk 1.10.7 is in Pool0 and other disks on  
this loop/domain are in Pool1. Disks/interfaces need to be in separate  
pools for SyncMirror.
```

- The error is observed on SyncMirror aggregates.
