

Could we block external servers accessing volumes via NFS?

https://kb.netapp.com/on-prem/ontap/da/NAS/NAS-KBs/Could_we_block_external_servers_accessing...

Updated: Sat, 04 Apr 2026 17:34:42 GMT

Applies to

- ONTAP 9
- NFS
- Export Policy (denying all access and assigned to the volume)

Answer

It is possible following one of the 2 following solutions:

- Using a "no access" export policy, clients may need to unmount and remount the volumes to fully enforce the new restrictions.
This is because existing NFS sessions may not immediately recognize the policy change due to caching on the client side

- Taking the volumes offline, no unmount/remount is necessary, as the volumes will be inaccessible immediately
