

NFS client disconnect during ONTAP takeover/giveback

https://kb.netapp.com/on-prem/ontap/Ontap_OS/OS-KBs/NFS_client_disconnect_during_ONTAP_take...

Updated: Fri, 18 Sep 2026 06:23:06 GMT

Applies to

- ONTAP 9
- Linux NFS clients

Issue

- NFS client sessions are disconnected for approximately 90 seconds during NetApp takeover/giveback test.
- Disconnect confirmed via continuous write/tail and ping monitoring from Linux server.
- Takeover executed with command: `storagefailovertakeover-ofnode -skip-lif-migration-before-takeover true`.
- Giveback performed automatically after node restart.

- NFS protocol used (NFSv3).
- Impact observed on Linux clients mounting test volume.
