

What is the scope of timezone settings in ONTAP

https://kb.netapp.com/on-prem/ontap/Ontap_OS/OS-KBs/What_is_the_scope_of_timezone_settings_in...

Updated: Fri, 18 Sep 2026 06:23:08 GMT

Applies to

ONTAP 9

Answer

- There is no publicly available NetApp document that systematically lists the scope of all ONTAP time zone settings across every feature.
- In general:
 - ONTAP uses Coordinated Universal Time (UTC) for internal processing and certain audit-related records.
 - User-facing timestamps tend to be displayed using the time zone configured on the cluster.
- Time handling is implemented independently by individual ONTAP features and services.
- The timestamp format and time zone used by a specific feature are determined by that feature's design.

- ONTAP does not provide a general mechanism to switch all timestamp displays between UTC and the cluster-local time zone.
- As a result, some functions may display timestamps in UTC, while others display timestamps according to the configured cluster time zone.
