

Unable to reboot node in a MetroCluster IP (interfaces cross cabled)

https://kb.netapp.com/Advice_and_Troubleshooting/Data_Protection_and_Security/MetroCluster/Unabl...

Updated: Sun, 01 Aug 2021 16:50:51 GMT

Applies to

- MetroCluster IP
- ONTAP 9.3 and later
- One cluster rebooted

Issue

During boot of the of site of a MetroCluster IP the following message is displayed:

```
Dec 06 03:52:47 [ClusterA:ha.partner.dbladeId:debug]: D-blade ID of the partner  
node is 707e7e25-bf8c-11e7-ae42-00a09897cb9f
```

```
MCC DR state check failed, retrying after 2 seconds...
```

```
MCC DR state check failed, retrying after 2 seconds...
```

```
Checking MCC DR state... [enter Ctrl-C(resume), S(status), L(link)]_____
```

The display of the "_" behind the message is the indicator for this issue.
