

Operation not Supported error on RHEL when setting NFSv4 access control list (ACL)

https://kb.netapp.com/Advice_and_Troubleshooting/Miscellaneous/Operation_not_Supported_error_on...

Updated: Sun, 11 Jul 2021 11:13:33 GMT

Applies to

Data ONTAP 7 and earlier

Issue

- When attempting to set ACLs on a NFSv4 volume with the `setfacl` cmd from a RHEL 5 client, the following error is displayed:

`Operation not supported`

- While Network File System(NFS) clients set nfsv4 ACL on files, the following error is displayed:

Failed setattr operation: Invalid argument
