

Multi admin verification fails for domain user who is part of the approvers group

https://kb.netapp.com/on-prem/ontap/Ontap_OS/OS-KBs/Multi_admin_verification_fails_for_domain_us...

Updated: Sat, 04 Apr 2026 15:00:12 GMT

Applies to

- ONTAP 9.14 or lower
- Multi-Admin Verification (MAV)

Issue

MAV approvers that are part of a domain group receive error when attempting to approve MAV requests:

```
::*> multi-admin-verify approval-group show
Vserver  Name                Approvers
-----  -
cluster  approvalGroup1  DOMAIN\group
```

```
::> security multi-admin-verify request approve -index 9
Error: command failed: The user "DOMAIN\user" is not authorized to approve this
request.
```
